**Subject:** RE: Former Standard Oil Bulk Plant #5482, Wedron, IL - Land Survey and Geophysical Survey

Mary and Doug,

Was the geophysical survey completed at the former Standard Oil Bulk terminal. When will the report be completed and sent to the agency. What is your schedule for conducting field work?

Thanks,

Steve Faryan

USEPA Region 5

Steve and Jacquie – the below notice to Steve was kicked back for some reason. Please confirm receipt, and let Luisa Price of Stantec or me know if you have questions.

Jacquie – thanks for your voice mail yesterday. If you still would like to talk, I'm in all day today.

Thanks.

**Subject:** Former Standard Oil Bulk Plant #5482, Wedron, IL - Land Survey and Geophysical Survey

Mr. Faryan,

Stantec Consulting Services Inc. (Stantec), on behalf of BP, will be conducting a land survey to confirm former bulk plant lease property boundaries on Tuesday (10/29/13). The following day on Wednesday (10/30/13), Stantec will be conducting the geophysical survey to scan for the presence of underground storage tanks and utilities on the former lease property. These activities will be conducted in accordance with the Proposed Work Plan dated September 19, 2013. Please note that no field sampling will be conducted during the surveys. The land survey will be completed by Atwell, LLC (Atwell) and the geophysical survey will be completed by Ground Penetrating Radar Systems, Inc. (GPRS). Stantec will provide oversight of these subcontractors. The required insurance has been obtained by Stantec, Atwell and GPRS.

Please let me know if you have any questions or need additional information.

Thank You,

**Luisa Price**
